

Invitation to DTU Food Conference/Site visit

And meet the START hubs “Health” & “Future Agrifood Systems”

Date: November 12th, 2024
- Conference from 9.00-16.00
- START hub meeting from 13.30-15.00

Venue: DTU Food, Henrik Dams Alle building 202 room 8003, Kgs. Lyngby

Participants: Researchers with interest in health promotion and disease prevention related to food production and consumption

Registration: Only 30 seats available. [Registration required here.](#)
Please mark that you will attend the START hub meeting.

Join us at the DTU National Food Institute annual conference

DTU Food hosts an annual conference displaying the type of research conducted at the Institute, with inspiring talks from key-note speakers in the morning, and a fair with stands presenting current research and guided tours of the labs in the afternoon. This year the theme will be health promotion and disease prevention related to food, especially focusing on toxicology, molecular biology and antimicrobial resistance. START can offer a limited amounts of seats for interested researchers to attend the conference.

At the same time, we invite you to get a chance to meet two of our hubs at a START hub meeting during the conference from 13.30-15.00. We will at the hub meeting explore how SSH researchers work with challenges related to the conference theme and provide an opportunity for early career researchers to present their work. The presentations will be followed by a discussion on how natural science and engineering can contribute to solve the type of challenges SSH researchers are working with.

We look forward to seeing you there.

Timothy Hobley DTU START Hub-coordinator – Future Agrifood Systems
Mette Lübeck AAU START Hub-coordinator – Future Agrifood Systems
Lisbeth Truelstrup Hansen DTU START Hub-coordinator – Health

Agenda for the START hub meeting

13.30-13.45	Welcome	by START hub-coordinators Timothy Hobley, DTU Food; Mette Lübeck, Aalborg University; and Lisbeth Truelstrup Hansen, DTU Food
	Introduction to the benefits of interdisciplinary research	by Professor Elinor Eva Mari Hallström, DTU Food
13.45-14.00	Poco a poco: The agricultural everyday live with climates and plants in Andalusian greenhouse production	by PhD fellow Trine My Thygaard-Nielsen, Dept. of Anthropology, Aarhus University
14.00-14.15	Does communication framing influence consumer attitude to edible insects?	by Research Assistant Alejandro Cordoba Ruiz, Dept. of Management, Aarhus University
14.15-14.45	Discussion on how natural science and engineering can contribute to solve the type of challenges just presented	facilitated by START hub-coordinator Timothy Hobley, DTU Food
14.45-15.00	Wrap up and START news	by START hub-coordinator Mette Lübeck, Aalborg University
